

Papa Ken Handyman LLC

Providing reliable home maintenance service

SUBJECT: Home energy saving check list.

- ✓ Seal leaks in ductwork
- ✓ Insulate exposed heat ducts in basement, garage, attic and crawl space.
- ✓ Clear space in front of heating units, registers and radiator
- ✓ Reduce water usage by using low-flow showerheads and repair leaking faucets and toilets
- ✓ Insulate the water heater tank and water pipes
- ✓ Wash clothes in cold or warm water. Rinse with cold water
- ✓ Dry laundry loads consecutively to maximize dryer efficiency
- ✓ Clean dryer vent and duct
- ✓ Replace incandescent bulbs with efficient compact fluorescent bulbs
- ✓ Use timers or motion detectors to turn off lights when not needed (motion detectors and timers can replace standard switches – additional wiring not required)
- ✓ Install air-sealing gaskets behind switch/outlet cover plates on exterior walls, inject minimally expanding foam around electric boxes.
- ✓ Lock windows to create a better seal
- ✓ Add weather stripping and caulking around doors and windows
- ✓ Seal around pipes and ducts that penetrate outer walls

I can help you with many of the above items to help you save energy and money!
